Why Portugal?

Portugal is currently a topic of conversation, across the world, for several reasons. It is more than just the sunny weather, low cost of living, great food, variety of world winning wines and charming people, that everyone is speaking about.

The reason is simple: Portugal is a place people actually want to live and can see the possibility of raising a family and doing business in. A combination of factors now encourages leading entrepreneurs to establish and grow their companies in Portugal.

Portugal – A Few Facts and Figures

Portugal is projected to exceed the European economic growth forecasts, at least until 2027. It has been ranked as one of the best places to live according to the Global Peace Index (currently ranking 7th on the 2025 Global Peace Index), offers very good healthcare according to the Health Care Index (with an average life expectancy of 82.95 years in 2025), and is ranked highly from an education point of view.

Traditional Portuguese Universities have become "Top Ranking" International Universities, the "Universidade Católica Portuguesa" and "Nova SBE" were included as two of the best universities in the world by the British newspaper, The Financial Times, in 2018.

It is without a doubt a place that ticks the boxes when choosing a place to live.
