

## *St Kitts & Nevis - A Summary: Wealth Management and Citizenship by Investment*

St Kitts & Nevis is a modern, forward-thinking financial centre located within the Eastern Caribbean. It has a unique history of legislative and fiscal independence and is at the forefront in terms of providing practical solutions to an increasingly mobile and international client base.

Nevis has developed a number of attractive options, over the years, to meet corporate and individual needs, and allowing clients to organise their affairs in an efficient and confidential manner.

Some of the jurisdiction's key benefits include:

- **Confidentiality** – beneficial ownership information is confidential
- **Agility** – a structure formed in another jurisdiction may easily redomicile to Nevis
- **Flexibility** – with cutting edge foundation legislation, a multiform foundation can take or change its form from either a trust, a company, a partnership or a traditional foundation
- **Security** – Trust Asset Protection Laws mean that any potential creditor must place a bond of EC\$270,000 / US\$100,000 before bringing any action or proceeding against trust property
- **Friendly tax environment** – no income tax, capital gains tax, estate tax, inheritance tax or gift tax
